

## Activity: Friendship Bracelet

Provide the children with appropriate lengths of stretchy, clear cording and a variety of beads. Tie a bead on one end of the cording to keep the beads from falling off as the children string them. Encourage the children to lay out a pattern before stringing the beads, but most of all it should be beautiful to them! Allow the children to make two of each bracelet – one for a friend and one to keep like the friendship we saw in **Country Dog and City Frog**.
